EPA Launches "Change the World, Start with Energy Star"

WASHINGTON — The U.S. Environmental Protection Agency (EPA) has launched a national campaign to help Americans become more energy efficient through Energy Star and also join in the fight against climate change. The campaign, called "Change the World, Start with Energy Star," helps people make energy-efficient changes at home and at work that can add up to both cost savings and significant reductions in emissions of greenhouse gases.

"Through our new 'Change the World, Start with Energy Star' campaign, we are helping people save green by going green," said EPA Administrator Stephen L. Johnson.

The campaign builds on the success of the Energy Star Change a Light campaign by providing a set of steps people can take to save money and reduce greenhouse gas emissions. In addition to replacing at least one light in the home with an Energy Star one, the new Energy Star campaign encourages consumers to:

- Make sure their heating and cooling systems are operating efficiently
- Make sure homes are well sealed and insulated
- Enable the power management features on home computers and monitors
- Choose Energy Star qualified appliances

According to the EPA, taking energy efficient steps at home and at work can make an important difference in addressing climate change. Buildings contribute about 40 percent of the nation's emissions of carbon dioxide, the primary greenhouse gas, as most of the energy used in buildings comes from the burning of fossil fuels. These emissions can be reduced substantially through energy efficiency and the steps of the Energy Star campaign.

President's Message

Last month, we tried something new with this year's satellite broadcast by making

it our official April meeting. The theme of this year's broadcast was "Integrated Building Design: Bringing the Pieces Together to Unleash the Power of Teamwork." In the broadcast, the discussion panel spoke in-depth about how all the different entities on a given job can maximize the end product by working closely as a team. They discussed in detail what this could look like and what some of the challenges may be.

I'd like to thank all of those who were able to attend. I'm sure next year's broadcast will be announced some time in the late fall, at which point we'll request feedback from the chapter as to the

format in which this is delivered.

As announced early last month, we will conclude this year's meeting schedule with a tour of the new REI distribution center in Bedford, followed by the Altoona Curve game. This facility is a LEED-Silver certified building and is considered one of the largest green distribution centers in the country. The plant tour will be given by George Frazier, Facility Director. The tour will begin at approximately 3:00pm and end around 5:30pm. After the tour we will be heading to the Altoona Curve game against the Akron Aeros at 6:35pm. Please contact Ryan Buff at rbuff@hflenz.com if you plan on attending this event.

As we come to the close of the 2007-2008 ASHRAE-Johnstown year, I'd like to thank all of the officers for their hard work and dedication throughout the year.

The strength of our chapter could not have been maintained without the commitment of these individuals. And as I turn over the reins to Chris Albright, I'm confident we will continue to bring value to our local members and represent us well throughout the organization.

That being said, please don't forget about our upcoming events this summer. Specifically, we will be holding this year's ASHRAE golf outing on July 17th at Champion Lakes Golf Course in New Florence and this year's CRC in Harrisburg on August 14-16th. I encourage all of you to block off those dates now to make sure you are ready to go!

See you at the meetings!

Tim Sample

Research Promotion

Fellow Johnstown Chapter ASHRAE members,

I am pleased to announce that the Johnstown Chapter is approaching our goal for Society's Research Promotion Campaign. However, we are still about 10% short. You can help put us over the top by joining the list below that has already donated:

Mr. Robert Stano
Mr. Thomas Sobieski
Mr. Christopher Albright
Mr. John Weiland
Mr. Christopher Wirick

Mr. Charles Shoemaker
Mr. Matthew Filan
Mr. Timothy Sample
Mr. Paul Petrilli
H.F. Lenz Company

There are two easy ways to donate. First, you can go on-line to the website www.ashrae.org/aboutus/resource_promotion.asp. ASHRAE has set up a safe and easy way to donate via credit card. Otherwise, you can write out a check to "ASHRAE Research" and I will mail it in to Society for you.

Thank you for your support.

Sincerely,

John Weiland, PE
Johnstown Chapter ASHRAE Research Promotion Chair

Our Mission

To advance the arts and sciences of heating, ventilating, air conditioning and refrigerating to serve humanity and

Our Vision

ASHRAE will be the global leader, the foremost source of technical and educational information, and the primary provider of opportunity for professional growth in the arts and sciences of heating, ventilating, air conditioning and refrigerating
